

# AMS - Fully Automatic Billing Run

## Time-saving and Independent Invoicing

Discover the practical Fully Automatic Billing Run in AMS! With this innovative feature, invoicing becomes not only more efficient and faster but also customizable for each of your customers.

Benefit from a fully automatic and time-controlled process that allows you to design the invoicing according to your scheduling preferences. Invoices are created fully automatically in the background, so you can focus on your core business.

Thanks to definable timings for sending invoices via email and printing invoices, you save valuable time while ensuring your cash flow even during staffing shortages. Take the next step in digitizing your invoicing with AMS!

## Your Benefits

### Better Use of Time Resources

Automation of invoicing saves working time

### Ensuring Cash Flow Despite High Sick Leave

Invoicing occurs almost independently of employees

### Individually Adjustable Shipping Times and Cycles

Consideration of the optimal timing for sending invoices

### Quick Payment Receipts

Invoice dispatch possible directly upon delivery note creation

## Overview of the Fully Automatic Billing Run

### General Requirements for Fully Automatic Billing Run:

- Quantity / Weight clearly defined
- Unique price (e.g., unit price) available
- Price created manually in advance
- Delivery note generated or goods delivered

### Customer and Sequence Approvals

- Release items for the Fully Automatic Billing Run and the cycle can be configured in advance
- Sequences that do not require checks can be invoiced without any additional checks.

### Invoicing Timing Freely Selectable

Invoicing can occur after delivery note creation or after delivery. When invoicing after delivery note creation, the invoices are always up to date.

### Additional Control Function:

The Fully Automatic Billing Run must be confirmed in advance by an authorized employee if reasons against this invoicing method have been recorded in AMS.

The Fully Automatic Billing Run offers the connection to invoice dispatch as email and as printout on a network printer for postal dispatch.

### Adjustable Invoicing Cycles:

- Weekly at a specific time
- Monthly at a specific time
- Quarterly at a specific time
- Optional exceptions for holidays

Multiple customer-specific invoicing rhythms can be configured.

### Reminder Function Configurable

AMS allows the setting of notifications to remind employees when invoice items for a customer have not been invoiced for a defined number of days.

Upon request, optional user training for the Fully Automatic Billing Run is possible. Our training team is happy to create a customized offer for you.

## Required Licenses:

The fully automatic billing run is a special function and will be set up for you by TTC support. We are happy to provide you with an offer.

## Further Requirements:

- Remote print server or network printer
- Person-independent email sender for invoices if email dispatch is desired.
