# AMS Quotations Module

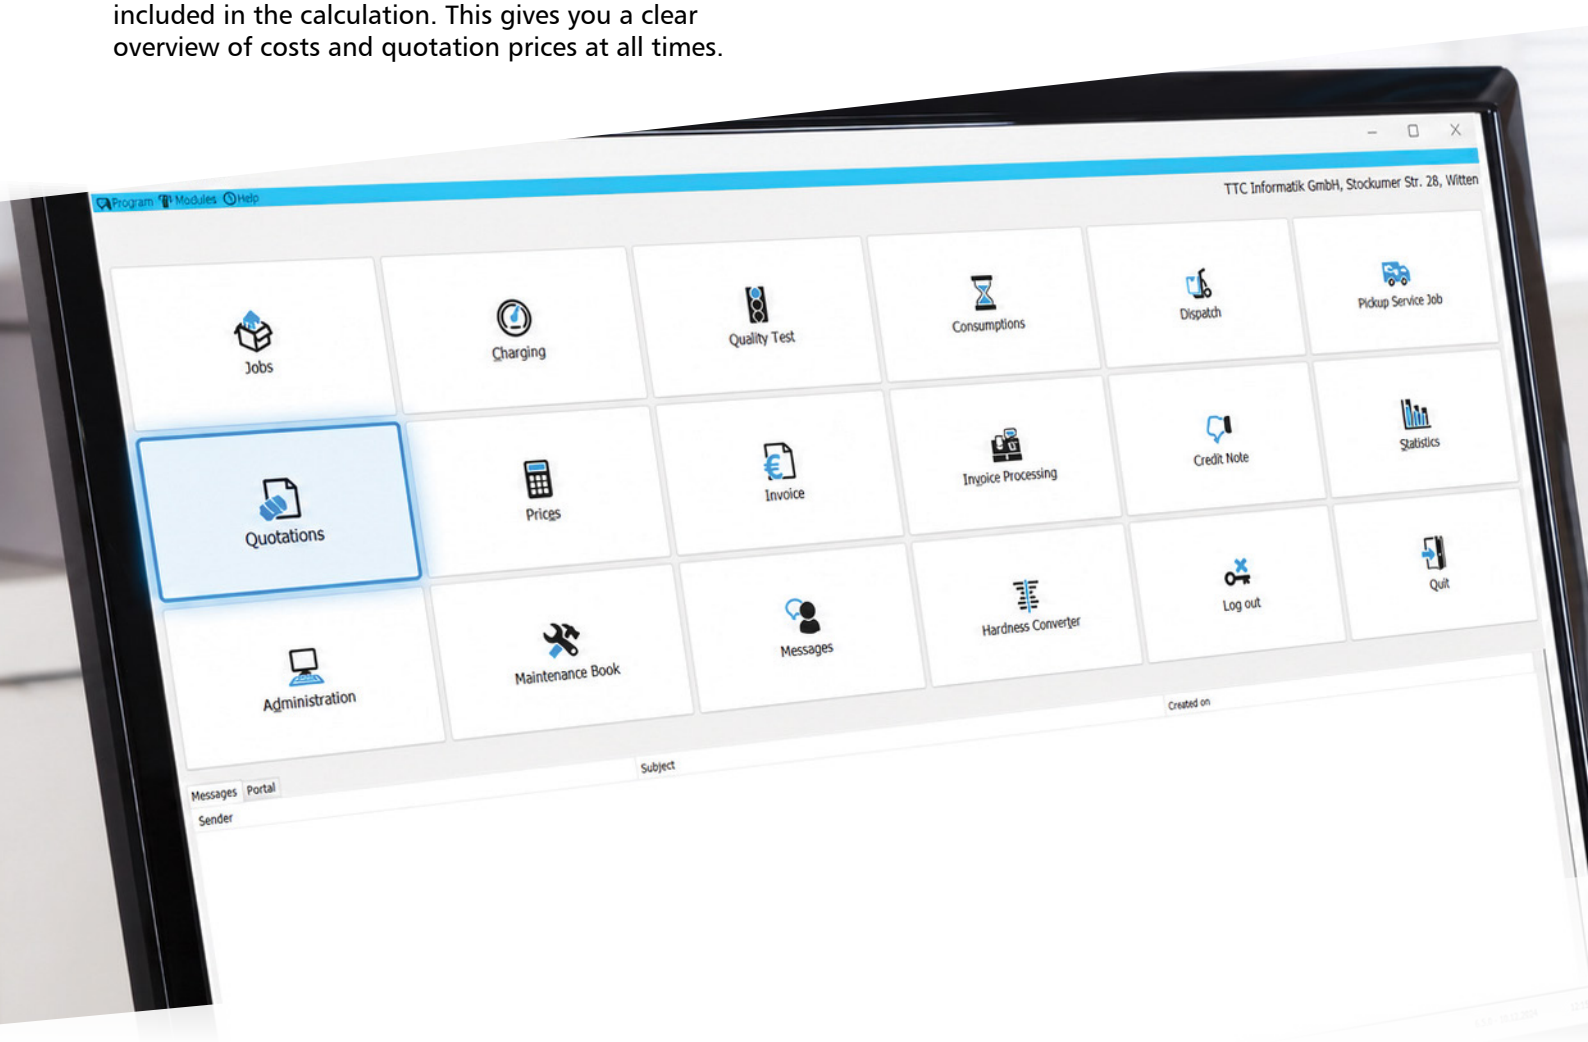

## Quick Quotation Calculation, Flexible Customization, Professional Presenation

With the AMS Quotations module, you can create and calculate quotations efficiently, clearly, and flexibly. From price calculation and the use of existing data to final document creation, AMS supports you throughout the entire quotation process.

Calculate services accurately, adjust prices individually, and use data with just a few clicks. Heat treatments, work processes, and price groups can easily be included in the calculation. This gives you a clear overview of costs and quotation prices at all times.

Further processing and sending are also seamlessly integrated: Create, review, print, or send your quotation documents directly from the current calculation.

You benefit from less manual work, greater transparency, and a consistent, professional quotation process.

## Your Benefits

**Calculate Quotations Faster**
Automatic price calculation based on your existing data

**Easily Use Existing Data**
Using existing quotations and master data reduces manual work

**Flexible Customization**
Services, prices, and sequences can be customized at any time

**Professional Further Processing**
Create, print, send, and export your quotation documents directly from the calculation

# Overview of the AMS Quotations Module

**General Functions**
- Create, edit and send quotations
- Color-coded quotation statuses
- Assignment to job items
- Create cover letters, including placeholders
- Calculate prices
- Perform feasibility analyses
- Search functions with a list view
- Document creation

**Test Plan**
Test plans can be included in quotation items when creating a quotation. When the quotation is converted into a job, the test plan is transferred to the corresponding job item.

**Numerous Search Criteria Available**
- Quotation No.
- Customer
- Validity/expiration date
- Resubmission date
- Last modified/last modified by
- Material/Specification
- Quantity/weight, etc.

The results are displayed in a list.

**Responsible Employee**
A responsible employee can be assigned to each quotation. This makes it easy, for example, to assign commissions at a later stage.

**Feasability Analysis**
A feasibility check or risk assessment can be created for each quotation. The parameters to be checked can be configured individually.

For multiple different feasibility checks, risk minimization, and additional employee support, the optional AMS$^{Q\&A}$ Questionnaires are also available.

**Notifications**
Automatic notifications can optionally be configured in the administration using AMS$^{MSG}$ Messages.
This allows the responsible employee to be notified in advance when quotations are approaching their expiration date.

## Required Licenses
The Quotations module is included in the AMS basic installation. However, an appropriate license is required for certain additional functions.

## Complementary AMS Extensions
AMS$^{Q\&A}$ Questionnaires
AMS$^{MSG}$ Messages
